Acknowledgments XIII

Preface XVII

Introduction 1

Changing people's behavior – it really is possible... 1

...but the name of the game is failure! 2

When making decisions, humans do not think like
homo economicus 4

The behavioral economics and neuroscience revolution 4

The Nudge revolution: how to change people's behavior
effectively 8

Part one

A brief history of the revolution

1. The main players 15

The pioneers: Herbert Simon and the proponents of
bounded rationality 15

Paul Slovic and the psychology of decisions 19

The founding fathers: Amos Tversky and
Daniel Kahneman 21

Richard Thaler and Cass Sunstein:
the Nudge-men and the public policy revolution 23

George Loewenstein and the leading academics 24

Dan Ariely: behavioral economics marketer-in-chief 26

Antonio Damasio and neuroscience	27
Colin Camerer and the rise of neuroeconomics	30
David Halpern, Esther Duflo and the behavioral economics practitioners	31
2. The stages of the revolution	35
The prerevolutionary period: 1950-1970	35
The underground revolution: 1970-2002	36
The acknowledged revolution: 2002-2010	38
The revolution in action: from 2010 until today	40
3. The weapons	45
The atomic bomb: the experimental method	45
Taking aim: everyday individual decisions	47
The key indicator: behavior	48
A revolution in search of a better world	52

Part two

**How Homer Simpson
dethroned Superman**

4. The Superman illusion (and the Homer Simpson reality)	55
The six fundamentals of human decisions	57
Rational? You said rational?!	58
5. Our logical process is highly chaotic	63
The eleven logical illusions	63
Illusion 1: we are creatures of comparison, not reason	64
Illusion 2: the impact of salience	67
Illusion 3: our preferences are driven by familiarity	70
Illusion 4: loss aversion – we prefer not losing to winning	72
Illusion 5: we have excessive affection for things we own or which we make with our own hands	73
Illusion 6: we love it when our existing beliefs are confirmed	76
Illusion 7: our perception is guided by expectation	78

Illusion 8: we prefer the present to the future	80
Illusion 9: our willpower is generally not all that strong... and it gets weaker over time	81
Illusion 10: we are influenced by stereotypes and assumed causalities	83
Illusion 11: 'mental accounting' – how we compartmentalize our money	85
6. We are emotional beings	87
Emotional states change our behavior	89
Visceral factors: how our basic emotions can overwhelm us	91
The influence of our prevailing emotions: from humour to stress	93
Regret, deception, and the impact of emotions on our future choices	95
Rokia, and the identified victim effect	96
7. We are social beings: a biological phenomenon?	99
Social norms: the burden of behaving as we're meant to	101
The importance of the messenger and the authority figure	103
Peer influence	105
Group pressure	108
Reciprocity and fairness	110
Pre-commitment	112
8. We are creatures of context	115
Our preferences change according to the formulation of the options	116
Default options: a powerful way of steering decisions	118
'Hidden drivers': an important factor in decision making process	120
The 'decoy effect': how to change people's choices by offering them something they don't want	124
Too much choice can kill desire	125
The impact of the decision location	126

X NUDGE MARKETING

How we pay affects what we decide to buy	127
‘Priming’: how environmental triggers can influence behavior	129
9. We are creatures of habit	131
The majority of our daily decisions are grounded in habit	132
Habits: how our brains save on resources	133
The ‘habit loop’	134
Habits: a way of managing our time that overshadows individual will	135
Two biases: inertia and the status quo	137
10. We are creatures of intuition and strangers to ourselves	139

Part three

Nudge marketing applied to public policy

11. The Nudge approach: the devil’s in the detail	147
12. Five years of Nudge: an overview	153
Nudge and public finances	154
Funding a pension savings scheme in the USA	156
Nudge and energy saving	158
Nudge and public health	161
Nudge, education and poverty	167
Improving workplace performance	172
13. How to design successful Nudges	179
MINDSPACE and EAST: two sources of inspiration from the Behavioural Insights Team	180
The Rotman School of Management’s guide to nudging	186
The BVA NudgeLab: guiding and inspiring the creation of effective Nudges	189

*Part four***From Nudge to Nudge marketing**

14. The Nudge marketer's mental framework	225
Today's marketer uses yesterday's (false) knowledge	225
The Nudge marketer's mental framework	227
15. A base for the construction of effective actions	233
Understanding the core elements of a decision and the specific features of a situation	233
More than words: ethnography, neuromarketing, and big data	234
16. The five phases of Nudge marketing	245
Phase 1: preparing people's mindsets	246
Phase 2: attract attention	255
Phase 3: steering consumers in the right direction	261
Phase 4: from intention to action – the levers of change	268
Phase 5: solidify the change and make the behavior more widespread by forming habits and encouraging social contagion	275
17. Predictive testing	283
Choose your context badly and you'll end up with a weak evaluation	283
Given enough time, everybody understands	288
